New Content In This Section

This section is **generally optional**, as we only practice and apply what we learned

But there is some new content as well

Handling form submission with JavaScript & creating objects with the "new" keyword

Managing data with JavaScript, HTML and the "data-" attributes

Page / Project Features

Configure Player Names → Form with input field in modal overlay; also validate user input and show validation feedback

(Re-)Start Game → "Start Game" button should clear current game board or "Game Over" message

Turn-based Gameplay → Turns should switch automatically between the two players, every player has his / her own symbol

Select Fields & Check for Winner → Game fields are clickable & the player's symbol is displayed; Check for winner (regular Tic-Tac-Toe rules) after every turn

Show "Game Over" Window → Present "Game Over" message which highlights winner (or draw) once the game ends
